Program

Invited Lectures (I.L.):

 - Daniel Alvear Portilla. GIDAI (Universidad de Cantabria).
"Modeling pyrolysis of a lineal low density polyethylene through a coupled DSC/TGA analysis"

 - Borja Arias Rozada. Instituto Nacional del Carbón (INCAR), CSIC.
"Postcombustion CO_2 capture by Ca-looping"

 - Jaime Carpio Huertas. Universidad Politécnica de Madrid.
"Ideas to create an adaptive finite element method for combustion problems"

 - Gabriel García Soriano. Dpto. de Física Matemática y de Fluidos (UNED).
"Burning velocity of concave (negatively stretched) flame tips: Experiments and Modeling"

 - Olaf Lemp. Universität Stuttgart
"Modelling of Mineral Transformations and Slagging in PC Flames with CFD Code AIOLOS – Conventional air flames and prospects for oxy-fuel combustion "

 - Amable Liñán Martínez. E.T.S.I. Aeronáuticos. Universidad Politécnica de Madrid.
"On the combustion of hollow cone sprays generated by pressure-swirls injectors"

 - Bertrand Naud. Centro de Investigaciones Energéticas, Medioambientales y Tecnológicas - CIEMAT.
"Modelling of turbulent flames with tabulated reduced chemistry, based on mixture fraction and progress variable"

 - Pedro Otero Ventín/Jesús Ramos Lage.Fundación Ciudad de la Energía.
"The CIUDEN Center for Technological Development of CO_2 Capture and Transport. Opportunities for mathematical modeling"

 - Laura Saavedra. Universidad Politécnica de Madrid.
"Mathematical modelling and numerical solution of group coal combustion"

 - Antonio Luis Sánchez Pérez. Grupo de Mecánica de Fluidos. Universidad Carlos III de Madrid.
"The reduced-kinetic description of hydrogen-air premixed-combustion problems relevant for safety applications"

 - Jong Soo Kim. Korea Institute of Science & Technology.
"Technological and Theoretical Challenges in Oxy-Fuel Combustion"

 - Michael Stoellinger. Delft University of Technology.
"Mathematical modeling of pulverized coal combustion based on transported PDF methods"

Short Presentations (S.P.) / Posters (Po.):

 - Elena Martin. Universidad de Vigo.
Some numerical simulation and reduced order modelling techniques applied to the control of steel products heating industrial furnaces.
 - José Graña Otero. UPM.
Nonlinear Dynamics of Unsteady Premixed, Planar Flames.
 - Mario Durán Camejo. Universidad Carlos III de Madrid.
Homogeneous Vapor Condensation of Combustion Products in Boundary Layer Flows

Schedule:

Time
Monday 23th
Tuesday 24th
Wednesday 25th

09:00-09:30
Registration

09:30-10:00
Opening

10:00-10:45

I.L.: Amable Liñán

I.L.: Daniel Alvear Portilla

I.L.: Bertrand Naud

10:45-11:30

I.L.: Antonio Sánchez Pérez

I.L.: Borja Arias

I.L.: Olaf Lemp

11:30-12:00
coffee break
coffee break
coffee break

12:00-12:45

I.L.: Jong Soo Kim

I.L.: Michael Stollinger

I.L.: Jaime Carpio

12:45-13:30

I.L.: Pedro Otero y Jesús Ramos

I.L.: Gabriel García Soriano

I.L.: Laura Saavedra

13:30-16:00
lunch
lunch
lunch

16:00-16:20

Po.: Fernando Varas Mérida

Short Presentations

Posters

16:20-16:40

S.P.: José Graña Otero

16:40-17:00

S.P.: Mario Durán Camejo

17:00-18:30

Posters
