Conference Aims

The RSME Conference on Transfer and Industrial Mathematics is supported by the Royal Spanish Mathematical Society, a scientific society whose main aim is the promotion of mathematics and its applications, as well as the encouragement of research and teaching at all educational levels.

The three day conference will present successful experiences in the field of mathematical knowledge-transfer to industry, and will illustrate the following:

- The extent to which collaboration with industry has opened up new lines of research in the field of mathematics, and the impact on internationally renowned journals and the development of doctoral theses.
- How the promotion of existing infrastructures has contributed to enhance the transfer of mathematical knowledge to industry.
- The creation of postgraduate programs aimed at training in mathematics with industrial applications.

The conference will include talks from researchers and industry representatives who will present their different points of view and experiences with regards to the transfer of mathematical knowledge to industry.
